TIME FOR A CHANGE

Although the Parklawn Health Library has been in existence since 1969, there are individuals who do not know about the library and how it can assist them with their information needs. To enhance our customers' knowledge about the library, we have decided to modify the first page of this Bulletin to highlight one of our products or services each month. In addition, we will bring to your attention other products and services in the information field that might help with your research requirements.

We hope this change will expand our current customers' knowledge about the library and encourage new users to become long-time customers. We invite you to share this Bulletin with your colleagues and friends. Look for our April issue which will feature "Who We Are."

N.B. Please visit the library on the Internet at
<http://library.psc.gov>

AFRICAN-AMERICAN TEEN SMOKERS AND TOBACCO USE

Recent research indicates that adolescent African-Americans who smoke are more likely to experience the negative effects of tobacco-use earlier than their non-African American counterparts. NIDA is supporting research on the ethnoracial differences of the metabolism of nicotine.

MALNUTRITION

Malnutrition is a nutritional disorder that is caused by inadequate intake or inadequate digestion of nutrients. The consequences of malnutrition include impaired cognitive and physical development, decreased resistance to disease, and increased mortality. The NCHS has published

data on the effects of malnutrition.

THE NATIONAL COMORBIDITY SURVEY

The National Comorbidity Survey (NCS) was a Congressionally mandated survey of psychiatric disorders designed to produce data on the prevalence, causes, and consequences of psychiatric morbidity and comorbidity in the U.S. It was the first U.S. survey to administer a structured psychiatric interview to a nationally representative sample of the general population. The NCS collected data from 8098 respondents aged 15-54 between September 1990 and February 1992. The majority of the funding for this survey was provided by NIMH.

RANKINGS OF HEALTH PLANS BY PATIENTS

A health plan is defined as a specific set of health benefits packaged for the health insurance needs of a special purchaser. One outcome of recent AHRQ-funded research suggests that a patient's age and health have a definite impact on how the patient rates his or her health plan. Therefore, rating plans by subgroups of patients may provide more accurate comparisons.

SERVICES FOR AT-RISK YOUTH

Some factors which contribute to placing youth at-risk are poverty, single parent families, lack of educational resources, and homelessness. The Family and Youth Services Bureau of the ACF provides national leadership on youth issues and assists individuals and organizations in providing effective, comprehensive services for youth in at-risk situations and their families. Some primary goals of this Bureau are to provide positive alternatives for youth, ensure their safety, maximize their potential to take advantage of available opportunities, and maintain family unity.

GUIDE TO LIBRARY RESOURCES

CONCISE ENCYCLOPEDIA OF CHRONIC FATIGUE SYNDROME. Patarca-Montero, Roberto, Haworth Medical Press, New York, NY, 2000. Ref-Dict WB 13 P27

The purpose of this concise encyclopedia is to summarize the knowledge gained and published about chronic fatigue syndrome in the past three years. This encyclopedia contains a list of abbreviations, notes for further reading, and an index. Entries in this book include:

- Allergies
- Cancer and fatigue
- Fibromyalgia
- Monocytes
- Pain
- Sleep
- Tapanui flu

DIRECTORY OF RETIREMENT FACILITIES. HCIA-Sachs, Baltimore, MD, 2001. Ref-Assn WT 22AA1 D62856

This directory provides the most comprehensive national listing of retirement facilities currently in operation. It includes more than 14,000 residential alternatives for today's older Americans. Four types of facilities included in this directory are: assisted living, congregate care, independent living, and continuing care. Entries are arranged alphabetically by state and city then alphabetically by institution name. Each entry includes:

Facility name	Mailing address
Local address	Fax
Phone	Website
E-mail	Facility administrators
Contact name	Type and number of units
Arrangements at each facility	Nursing services available
Services at each facility	Date opened
State licensing information	Languages spoken
Owner information
